★ BERRY COMPLIANT

The HIGH GEAR™ Impact Reduction suit is state-of-the-art, force-on-force, scenario equipment designed to help create the most realistic training experience. Custom athletic design ensures snug fit for maximum range of motion and protection. The complete suit contains 8 components. HIGH GEAR™ is perfect for all aspects of combatives, like detainee handling drills & CQB, to more conventional training like MMA, grappling and the striking arts.

HEAD GEAR

- State-of-the-art design with integrated foams to protect the chin, jaw, cheekbone and eye-socket.
- Full Plexi-Glass shield rests on a 100% leather encased, molded 1/4" HMWPE plastic frame with four adjustable straps for secure fit.
- Marking cartridge helmet option available.

THROAT GUARD

- Form-fitting, contoured plastic and padding ergonomically rest against the windpipe & throat.
- Offers additional protection from accidental strikes to the throat.

TORSO PROTECTOR

- Unprecedented mobility unavailable in any other chest guard on the market.
- Wrap around protection for the critical floating rib and solar plexus region.
- Unique foam and plastic trauma plate inserts protect the brachial tie-in, shoulder, clavicle and spinal regions.

COMBAT GLOVES

- 100% leather, open palm design for excellent sensitivity for weapons and transition to detainee handling.
- Plastic trauma plates protect the metacarpals and thumb from shock damage during training.

ELBOW/ULNA PADS

- Innovative design provides extended protection to the ulna, forearm, elbow and triceps region.
- Designed for delivering forearms & elbows during CQC, crowd penetration or ground and pound.

COMBAT SHORTS

- Lightweight, one-piece design with heavy duty lycra covering offers flexible protection for the complete upper thigh, hip and tailbone.
- Internal padding and trauma plates allow movement to grapple, kick, run or sit.

SHIN/KNEE PADS

- Wrap-around design protects the calf and knee cap.
- Additional cushioning for the MCL and LCL ligaments.
- Lightweight, tight-fitting with plastic trauma shields to protect the shin bone and top of the foot.

PERONEAL NERVE PADS

- Additional padding for knee and shin kicks to the nerve clusters above the knee.
- Fills the gap between the top of the shin pads and the bottom of the combat shorts.

PROVEN PERFORMANCE

HIGH GEAR is currently used by these elite organizations:

- ▶ Army Special Forces at USASOC, USASFC, USAJFKSWCS

- ▶ State Department
- ▶ DHS
- ▶ FPS
- ▶ US Marshal Service
- ▶ FLETC
- ▶ and many more.

HIGH GEAR FEATURES

BENEFITS

Impact Reduction Technology

- Engineered to dissipate impact while transmitting force to the wearer
- Allows the user to experience realistic biofeedback when contact is made

Lightweight

- Complete suit weighs 9 - 11 lbs depending on size (half the weight of other training suits)

Natural Movement

- Unparalleled range of motion, allows the role-player total flexibility to use any grappling, striking or fighting system

Ergonomic Design Allows Role-Player To:

- Wear duty gear or clothing over suit
- Improve timing and accuracy
- Utilize any combative tactic
- Speak clearly because of specially designed mouth and chin protection
- Train in real environments like rooms, halls, elevators, vehicles, buses and so on

Ability to Flex Cuff

- The only training gear in the world that allows the role-player to be flex-cuffed or handcuffed

Marking Cartridge Compliant

- Our MCR helmet is the only close quarter helmet approved for Simunition®, UTM® and AirSoft™

Easy to 'Suit Up'

- Role-players can be ready for training in 3 minutes – *Less time waiting, more time training*

STXs

- Can be used in any scenario training from CQB to PSD with training weapons or empty-hand techniques
